13 April 2018

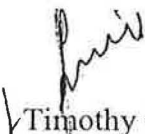

Dear Parents,

Target Setting for P6 Boys

In order to help our boys as they prepare for the PSLE, we would like to help them focus their efforts by providing academic goals to achieve. To this end, the school has used an IT-based system to provide personalised academic targets for each boy. These targets are derived based on each boy's previous academic performance and projected based on the past performance of PSLE students and it also includes an element of challenge to stretch them to their potential based on their teacher's observations. With these targets, their teachers will discuss with them how they intend to achieve these targets and to encourage them to plan and manage their time wisely.

Targets will be provided for each PSLE subject as well as the estimated PSLE aggregate. As each boy has different gifts and abilities, these targets are intended to provide reasonable and realistic academic goals so that they would not be overly or under stressed in working towards their PSLE. These targets are also not cast in stone and boys should be encouraged to discuss and adjust these targets further should they need to. We hope that you would also spend some time discussing these targets with the boys and to help them plan and manage their time as they prepare for the PSLE, and do continue to positively encourage and help the boys build their confidence and reach their academic potential.

Ora et Labora,

Timothy Goh
Principal
